It has the same layer-based editing as Photoshop does and shares the same basic interface. As with most software, Elements is developed to work well with a mouse, but the program supports trackpad and touchscreen features as well, making it a great alternative for computer owners who prefer those methods of operation.

Understanding the Elements Interface Like Photoshop, Elements is a raster program. It works with images. And, like Photoshop, Elements makes it easy for you to work with images at multiple levels of detail, whether you need to do a little light touchup, a major visual overhaul, or an entire retouching job. Figure 2-1 displays an example of a photo that has been opened in Photoshop. When you open a photo in Elements, you see an image with a small "close" button on top, as shown in the figure.

Click it to close the photo out of Elements and back into Photoshop. **\*\*Figure 2-1:\*\*** The Elements interface looks a lot like Photoshop, but you have more options than what's shown in this figure. The first thing you see in Elements is your photo, displayed at a typical size, as shown in Figure 2-2. If you're working with photos that are 10,000 pixels wide or more, you may see a zoom bar appear on the right side of the screen. You can scroll through the full-size photo by dragging the zoom bar. You can resize a photo by double-clicking and dragging the photo's edges — but doing this may distort the image's proportions. **\*\*Figure 2-2:\*\*** Opening an image in Elements, you see a few options on the menu bar at the top of the screen. You can use the Elements program in two ways. The first option is to double-click to open the photo. The Elements interface displays the photo in a manner much like the way you'd see it if you printed the photo in a photo album. When you mouse over an image, a small preview of the photo pops up on top of the photo. The second way to work with an image in Elements is to click the Edit

Wallace: I felt I was the right person for the job... We were winning, and we knew we were good enough to keep winning at that level. There are a lot of people here, but the quality was good. The goal is winning titles. It's a different mentality. Pep Guardiola was trying to win titles and it's not the way. For me, it was just to go and show [that] I know the quality I have, and that I can get better. Pep wants to win titles and we have four major trophies, so at the end of the day we are a good team. We can play, but we have to improve a lot. I will get used to it. On the difficulty of going from Barcelona to Bayern... I was in Barcelona with the first team, so I already had the confidence that I could do it. I came to a new team with a different culture and different players. I did not feel stressed. It was easy. You have to be able to adapt. I'm not a Messi. I'm not a Valdés. I'm not the centre-forward they have here. I have to adapt to the role they give me. I always try to do my best. I have great coaches. If you look at the last two years, it has been very good. On what he sees in Vidal... He wants to keep the ball. He's very good in one on one. He is young. He has many years to go. He is very quick and he is very sharp. That's how we have started to play [after the change in management]... He is a very good player, but he wants to do more. He is young and he will improve a lot. He's very good with the ball at his feet, but he is not the greatest at what he does with the ball in front of him. He's an excellent player, but he has to learn. On Tomáš Ujfaluši... We decided that because our goal is to improve, we needed to change. We need to improve our attack and our play. We wanted to play a little bit more direct, and in a 5-4-1. We have many positions that are changing and we are trying a new formation. We have many good players, but we have to win our games. It is a shame that we lose games here, but it's football. You are only as good as the last result you have
